PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience designing and building scalable, cloud-native applications using Java, Spring Boot, and microservices architecture. Strong hands-on expertise in Google Cloud Platform (GCP), Kubernetes (GKE), and CI/CD pipelines. Proven ability to deliver high-performance, event-driven systems in Agile environments. Passionate about clean code, system design, and delivering measurable business impact.

TECHNICAL SKILLS

Programming Languages:

Java, JavaScript, SQL

Backend & Frameworks:

Spring Boot, Spring MVC, Spring Cloud, REST APIs, gRPC, Microservices Architecture

Cloud & DevOps:

Google Cloud Platform (GCP), Kubernetes (GKE), Docker, Helm, Terraform, Jenkins, CI/CD, GitOps

Messaging & Streaming:

Apache Kafka, Google Cloud Pub/Sub, Event-Driven Architecture

Frontend:

React, HTML, CSS, Axios, React Query

Testing:

JUnit, Mockito, Jest, React Testing Library

Tools & Practices:

Git, GitHub Copilot, Agile/Scrum, Design Patterns

PROFESSIONAL EXPERIENCE

Publicis Sapient – Pune, India

Senior Associate Platform | Jan 2024 – Present

- Designing and developing scalable cloud-native applications using **Java, Spring Boot, and Microservices Architecture** for enterprise banking solutions.
- Building distributed systems on **Google Cloud Platform (GCP)** using services such as **GKE, Pub/Sub, Cloud SQL, Cloud Storage, and IAM**.
- Developing event-driven asynchronous processing solutions and integrating microservices using messaging-based architecture.
- Managing containerized deployments using **Docker, Kubernetes (GKE), and Helm charts**.
- Automating CI/CD pipelines and infrastructure provisioning using **Jenkins, Terraform, and GitOps practices**.
- Collaborating with architects, DevOps engineers, QA teams, and business stakeholders in Agile delivery environments.
- Contributing to system reliability, code quality, performance optimization, and engineering best practices across projects.

Amdocs Development Centre – Pune, India

Software Engineer | Aug 2021 – Sep 2023

- Developed enterprise-grade full-stack applications using **Spring Boot** and **React** in Agile/Scrum environments.
- Designed and integrated **RESTful APIs** for scalable customer-facing applications and backend services.
- Built reusable frontend components and implemented modern React development practices using hooks and state management libraries.
- Participated in end-to-end software delivery including requirement analysis, development, testing, deployment, and production support.
- Improved application quality through unit testing, integration testing, and code review practices.
- Worked closely with cross-functional teams including product owners, QA teams, architects, and UX teams.
- Recognized with the **Champions Award** for strong ownership and delivery contributions.

Tata Consultancy Services (TCS) – Thane, India

System Engineer | Feb 2019 – Aug 2021

- Developed and maintained enterprise Java applications using **Spring MVC** and RESTful web services.
- Worked on feature development, bug fixing, production support, and application enhancements across multiple releases.

- Collaborated with QA, frontend, and business teams to ensure smooth sprint execution and delivery.
- Participated in code reviews and technical discussions to improve application maintainability and stability.
- Gained strong exposure to enterprise software development lifecycle and Agile methodologies.

KEY PROJECTS

Automated Document Composition Platform

Client: Major UK-Based Banking Enterprise

Organization: Publicis Sapient

- Developed a large-scale automated customer communication platform responsible for generating personalized banking documents and communications.
- Architected backend microservices for document orchestration, template processing, metadata management, and communication workflows.
- Implemented asynchronous event processing using **Google Cloud Pub/Sub**, enabling reliable distributed communication between services.
- Designed cloud-native deployment architecture on **Google Kubernetes Engine (GKE)** with automated deployment pipelines.
- Implemented infrastructure automation using **Terraform** and optimized release workflows using **Jenkins CI/CD pipelines**.
- Contributed to improving scalability, resiliency, and deployment reliability for high-volume banking communication systems.

Tech Stack:

Java, Spring Boot, Spring Cloud, gRPC, GCP, GKE, Kubernetes, Docker, Helm, Terraform, Pub/Sub, Jenkins

Marketing Notifications Preference Management Portal

Client: Major US-Based Telecom Enterprise

Organization: Amdocs Development Centre

- Developed a customer self-service portal enabling telecom users to manage marketing communication preferences and notification subscriptions.
- Designed backend APIs for consent management, notification preferences, and customer communication settings.
- Built responsive frontend interfaces using **React.js**, reusable components, and modern state management patterns.
- Integrated frontend and backend systems through RESTful APIs with optimized asynchronous data handling.
- Implemented comprehensive unit and integration testing to ensure application stability and release quality.

Tech Stack:

Java, Spring Boot, React.js, REST APIs, React Query, Axios, JUnit, Mockito, Jest

PAN Acceptance & Processing Portal

Client: NSDL (National Securities Depository Limited)

Organization: Tata Consultancy Services (TCS)

- Contributed to the development of PAN application processing and verification workflows for NSDL's PAN acceptance platform.
- Developed backend modules for validation, application status tracking, and workflow management.
- Enhanced application stability through defect fixing, production support, and performance improvements.
- Worked with cross-functional teams to support feature delivery and regulatory process requirements.

Tech Stack:

Java, Spring MVC, REST APIs, SQL, JavaScript

EDUCATION

Bachelor of Engineering

Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV)

2014 – 2018 | Ujjain, India

CERTIFICATIONS

- Google Cloud Certified – Associate Cloud Engineer
-

AWARDS

- Champions Award – Amdocs Development Centre India
